Mount Marion Lithium Project Update

Neometals Ltd (ASX: NMT) (“Neometals”) is pleased to provide updated guidance on the anticipated timing of the first shipment for the Mt Marion Lithium Operation (‘Mt Marion’), in which it holds a 13.8% equity interest.

As at 21 December 2016, approximately 6,000t of concentrate had been produced from Mt Marion, with 3,000t stockpiled at port, and with trucking continuing around the clock. Several weather events have delayed material movements on site during December and subject to the availability of a suitable vessel, the first shipment of approximately 10,000t of concentrate is expected to depart Kwinana in January 2017.
